

mirostone®

SOLID SURFACES FOR EVERY ROOM

décor
collection book

something for everyone

Being solid, your Mirostone® will be hand finished by your installer. We recommend when installed into a kitchen, bathroom or utility room that Mirostone® is finished to a soft sheen. This will leave a surface that is beautiful, yet easy to maintain.

It is possible to finish Mirostone® to a high gloss, however this is only suitable in areas where use of the surface will be gentler: such as in a typical bathroom.

High gloss finishes require more care and maintenance.

Please consult your installer to find out more details.

The image displays a dense, granular texture characteristic of terrazzo. It features a light beige or cream-colored base matrix, which is densely populated with small, irregularly shaped aggregate particles. These particles vary in color, including shades of grey, brown, and off-white, creating a complex, speckled pattern. The overall appearance is that of a polished stone surface, likely used for flooring or wall cladding. The lighting is even, highlighting the fine details of the aggregate and the matrix.
